

VersaSpa® professional skincare™ **SPRAY TAN**

Do you get a lot of natural sun exposure but still can't seem to get a tan? If you have this issue, then sunless spray tanning is the ideal solution for you!

You probably know what spray tanning is, but are you aware of the benefits from it? One of the most important benefits of spray tanning is the boost to your self-confidence. We see this time and time again where new clients visit our salon and try spray tanning for the first time. They walk out with a beautiful smile because they love their new tan look. The psychological benefits are amazing and can easily improve a person's self-esteem. If you want to look sun-kissed and just can't get a tan from normal sunlight, then spray tanning is the next best solution.

The new VersaSpa® system is a full-body treatment system that allows you to select from a combination of solutions that will bronze and smooth your skin. Its open-air design utilizes skin care treatment solutions and state-of-the-art comfort technologies to fortify, moisturize and rejuvenate.

Rather than simple tinting, VersaSpa® creates a complete spa-like session that results in a healthy, natural looking tan. Choose from Venetian, for a darker Mediterranean-style tan, or the sun-kissed Bronzer tan. Looks that will impress you and your friends.

Choose Double Dark in either solution for the most intense & lasting tan IMAGINABLE! Not everyone has the time or ability to tan in the sun.
